Builder & Client-Side Operator. Two careers. One operating model. By day, primary contact for ~1,000 client companies across financial services, healthcare, medical technology, and consumer services, handling mission-critical communications and operating Abbott and Sorin pacemaker/ICD paging systems. By night, building production AI tooling: Seraphone (HIPAA-compliant voice answering service), RAPTOR (Pinecone and Tree-sitter codebase analyzer), and financial forecasting ML pipelines.

EDUCATION

Bachelor of Arts at Lawrence Technological University in Southfield, MI

- Degrees in Philosophy and Biology with a Concentration in Machine Learning.
- Relevant Coursework:** Symbolic Logic, Epistemology, Philosophy of Language.

WORK EXPERIENCE

Lead Agent / Technical Support Specialist at Rochester Telemessaging Center in Rochester, MI 05/2026 to Present

- Technical & Mission-Critical Comms:** Primary contact for ~1,000 client companies across financial services (advisors, wealth managers, trust attorneys), healthcare (doctors, hospitals, labs, DME suppliers), medical technology (Abbott and Sorin pacemaker/ICD rep networks), and consumer services. After-hours interface for high-stakes communications.
- Mission-Critical Systems:** Operate Abbott Medical Technology and Sorin pacemaker/ICD rep paging systems with discretion and technical acumen; handle complex, high-pressure situations.
- Team Leadership:** Advise other agents on complex or sensitive situations; coordinate with supervisors on scheduling and coverage across the client portfolio.

Operator at Rochester Telemessaging Center in Rochester, MI 06/2025 to 04/2026

- Front-Line Operations:** Handled high-volume inbound communications for ~1,000 client companies across financial services, healthcare, medical technology, and consumer services; dispatched calls and routed urgent inquiries.
- Protocol Fluency:** Built operational fluency across diverse client communication protocols and account-specific workflows; promoted to Lead Agent / Technical Support Specialist after 11 months.

Account Manager at Askia Inc in Detroit, MI 02/2025 to 06/2025

- Direct Sales:** Conducted neighborhood door-to-door solicitation for AT&T services (fiber optic internet, DirectTV, cell phone plans), consistently meeting or exceeding sales targets through consultative customer matching.
- CRM Analytics:** Utilized Salesforce to track conversion metrics and optimize client acquisition strategies.

POS Implementation Specialist at Celtica French Bakery in New Orleans, LA 10/2022 to 11/2024

- Systems Integration:** Led the full-cycle deployment of an integrated Point-of-Sale (POS) system, automating data tracking, streamlining operations, and improving system efficiency.
- High Volume Order Coordination:** Managed and fulfilled hundreds of specialty King Cake orders during Mardi Gras, overseeing order intake, production, and delivery logistics during the bakery's busiest season, ensuring timely and accurate service under high-pressure conditions.
- Process Automation:** Developed and implemented automated reporting processes, which reduced manual data entry errors by over 90% and enhanced data integrity. Fixed discrepancies in tip distribution, ensuring fairness for employees.

Server & Bartender at Saigon Café in Colorado Springs, CO 03/2022 to 09/2022

- Client Relationship Management:** Built a loyal customer base through personalized service and attention to individual preferences.

Assistant Researcher at BYOBeez in Appleton, WI 09/2017 to 01/2020

- Predictive Modeling:** Developed machine learning models that improved forecast accuracy by 25% using Python and R.
- Dashboard Development:** Created executive-level dashboards, translating complex statistical findings into actionable insights.
- Statistical Analysis:** Conducted regression analysis, time series forecasting, and multivariate testing.

PROJECTS

- Seraphone (Jun 2025):** Multi-tenant, HIPAA-compliant, real-time voice AI service that autonomously handles intake and scheduling, replacing voicemail and IVR trees with an intelligent receptionist. (Demos: 248-846-1901 & 248-710-0164).
- RAPTOR (Nov 2024):** Codebase analyzer built on Pinecone vector store and Tree-sitter parsing; enables semantic search and architectural mapping across large repositories.
- Finance ML (Jan 2025):** Financial forecasting pipeline featuring vector embedding clustering of market conditions and option overlay recommendation; additional models available on aebauer.dev and GitHub.

TECHNICAL SKILLS & CORE COMPETENCIES:

- Languages & Frameworks:** Python, TypeScript, JavaScript, FastAPI, React, Node.js, SQL.
- AI & Machine Learning:** OpenAI API, LangChain, RAG, Vector Embeddings, Pinecone, Tree-sitter, NLP, Predictive Modeling.
- Data & Backend:** PostgreSQL, Redis, Pandas, NumPy, Time Series Forecasting, Statistical Modeling, ETL Pipelines.
