

Alex Bauer

Full-Stack AI Engineer · Builder of Seraphone · Relocating to Denver, CO
(719) 355-5591 · alex@aebauer.dev · linkedin.com/in/alexander-e-bauer · aebauer.dev

PROJECTS

Seraphone: Scam Call Guard

seraphone.ai

Founder and sole engineer

2024 – Current

- Multi-tenant voice AI that answers customers' phone calls, live on the App Store: React, FastAPI, real-time telephony on Twilio and the OpenAI Realtime API, and an MCP tool server on GCP Cloud Run with Postgres/pgvector, Redis, and Stripe. 14,536 automated tests gate CI. Live demos: (971) 455-1825 (business) and (313) 476-2606 (family).
- Runs the company from Slack through an internal ops system: an email inbox plus an orchestration engine with support, ops, developer, and finance departments. One rule: the AI proposes, code checks, a human approves in Slack, every step is logged.
- Built a self-healing loop: a post-call judge grades transcripts against conduct rules; breaches and Grafana alerts open incidents, the RAPTOR code graph locates the cause, and a runner writes the fix as a pull request for human-approved merge. First auto-generated fix merged 8/2026.

Atlas in Relief

ml.aebauer.dev

- Interactive atlas of 26,988 research papers across disciplines, weighted toward AI and philosophy: Vertex AI embeddings, UMAP projection, and RAPTOR clustering drawn as an engraved deck.gl map, with a streaming research agent (2026).
- Lineage canon and turning-points pages trace the ideas across history that lead into the map.

RAPTOR Code Knowledge Graph

kg.aebauer.dev

- MCP bug-hunting tool for lead generation, built on a RAPTOR code knowledge graph: Tree-sitter chunking, pgvector retrieval, a GPU cross-encoder reranker with token-occlusion attribution, and GMM-clustered LLM summary layers; GitHub webhooks re-summarize only changed nodes. Ships as a Cloud Run MCP server (2024).

SELECTED EXPERIENCE

Rochester Telemessaging Center

Rochester, MI

Lead Agent / Technical Support Specialist

6/2025 – Current

- Primary after-hours contact for ~1,000 client companies across financial services, healthcare, and medical technology, including pacemaker/ICD rep paging and time-critical escalations for wealth managers.
- Promoted from Operator to Lead Agent after 11 months; supervises the floor weekly, leads new-associate onboarding and technology setup, and coordinates scheduling and coverage.

Celtica French Bakery

New Orleans, LA

POS Implementation Specialist

10/2022 – 11/2024

- Led full-cycle deployment of an integrated point-of-sale system; built automated reporting that cut manual data entry errors by over 90% and corrected tip distribution discrepancies.

BYOBeez

Appleton, WI

Assistant Researcher

9/2017 – 1/2020

- Developed machine learning models in Python and R that improved forecast accuracy by 25%; built executive dashboards translating regression and time series analysis into actionable insights.

TECHNICAL SKILLS

Python, TypeScript, FastAPI, React, PostgreSQL, pgvector, Redis, Twilio, OpenAI Realtime API, Vertex AI, RAG, MCP servers, Tree-sitter, GCP Cloud Run, Grafana, Stripe, pytest, CI/CD

EDUCATION

Lawrence University

Appleton, WI

Bachelor of Arts in Philosophy and Biology with a Concentration in Machine Learning

2016 – 2020
